## USPI Inline Filtration

### Stationary Filter Systems for Engines

ENGINES are critical pieces of machinery, supplying both transportation and electrical needs. It is imperative that they perform continuously with minimal downtime. Because they are not a closed system, these pieces of machinery continually inject contaminants (hard particulate and moisture).

The 1000H/C filter system offers you better protection from BOTH wear particles and water, thus extending the life of the fluid and engine. When it comes to engines, downtime isn't an option. The 1000H/C will offer you superior protection, boosting productivity and your bottom line.

#### 1000H/C Engine Specifications

- Chrome-Plated Filter Housing
- Steel Mounting Bracket
- Stainless Steel Piping
- Oil Sample Port
- Optional Flow Meter
- Pressure Regulating Valve
- Pressure Safety Valve
- Stainless Steel Ball Valve(s)
- Drain & Air Bleed Valves
- Pressure Gauges to Monitor Element Pressures
- Dimensions: 11"W x 36"H x 11"D
- Weight: ~35lbs.
- FILTER ELEMENTS SOLD SEPARATELY
