USPI Inline Filtration

Stationary Filter Systems for Oil Drilling Rigs

Mud pumps operate in harsh conditions with dirty, wet, viscous oils that typically need to be changed after only a few hundred hours' service.

Installing a USPI MPX inline filtration system that employs a simple approach to filtering that removes both solid contaminants and moisture from fluids will extend your mud pump components and fluid life to thousands of hours, saving time and money.

In addition, we offer a comprehensive oil monitoring and analysis program with personal service to ensure you get maximum life from your equipment, oils and filter elements.

88 MPX Series Specifications

- Chrome-Plated Filter Housings
- Power Coated Steel Mounting Brackets
- Stainless Steel Piping
- Oil Sampling Port
- Pressure Safety Valve
- Drain Valves
- Air Bleed Valve
- Pressure Gauges
- Pump: Varies by application

Class 1 Group C & D Rated Components

- Industrial Duty Motor
- Optional Immersion Heaters
- Optional Flow Switch
- Optional Vacuum Switch
- Indicator Lights
- Start-Stop Station

• FILTER ELEMENTS SOLD SEPARATELY
