USPI Exhaust Filters

Specially Designed for Vacuum Pumps

VACUUM PUMPS generate oil mist for a variety of reasons. The most common cause is pumping against an "open" or leaky system. US Petrolon exhaust filters capture oil mist allowing it to be recovered.

US Petrolon offers OEM quality exhaust filters at substantially lower-than-OEM cost. Through the selection of the appropriate coalescing materials and sealing methods used, US Petrolon's advanced line of coalescing filters guarantees your vacuum pumps a rare blend of exceptional performance, proven reliability and uncommon value allowing your equipment to operate correctly with minimal operational upkeep at an exceptionally low price.

Separator Specifications

- All Metal Frame (Core & End Caps)
- Specialized Sealing
- 30% More Media than most Coalescers
- Extended Interval Changes
- 99.97% Efficiency @ .30 microns
